

# CERTIFICATE

No.

HDCG-0109-24/23

**LGA Technological Center, S.A. (Applus+)**  
certifies that the Footprint of the organization:

## ARITEX CADING, S.A.U.

CENTRAL OFFICE  
C/ Progrés, 319  
08918, Badalona (Barcelona)

For the following activities of:

Design, production, and installation of machinery and tooling, as well as automation of production systems (for the automotive and aerospace industries, final vehicle assembly facilities, and high-production automatic assembly machines for general industry).

It has verified the greenhouse gas emissions assessment and carbon footprint calculation compliance for **Scope 1**: Direct emissions from the combustion of fossil fuels in fixed and mobile installations, fugitive emissions from leaks of refrigerant gases in air conditioning equipment and recharging of firefighting equipment, and welding processes; **Scope 2**: Indirect emissions from electricity consumption; **Scope 3**: Indirect emissions from business travel according to the **GHG Protocol** standard for the 2020, 2021, 2022, and 2023 campaigns, with the result of:

t CO <sub>2</sub> e VERIFICADO 2020	t CO <sub>2</sub> e VERIFICADO 2021	t CO <sub>2</sub> e VERIFICADO 2022	t CO <sub>2</sub> e VERIFICADO 2023
114,73 t CO <sub>2</sub> e	141,19 t CO <sub>2</sub> e	263,89 t CO <sub>2</sub> e	261,99 t CO <sub>2</sub> e

Barcelona, October 23, 2024

General Director  
Applus+ Certification B.U.

Xavier Ruíz Peña

Technical Director  
Applus+ Certification B.U.

Cristina Bachiller Martínez

## CLARIFICATION OF THE CARBON FOOTPRINT CERTIFICATE

---

As you know, in recent years we have been working steadily to reduce our carbon footprint and promote more sustainable practices in all areas of our organisation. In order to get an accurate picture of our progress and set more ambitious targets, we have taken advantage of the fact that SEAT has commissioned APPLUS to carry out a verification of the most relevant collaborators in order to validate the carbon footprint reported for the years 2020, 2021, 2022 and 2023.

The methodology for determining Aritex's carbon footprint consists of quantifying emissions using existing data and their equivalent in the consumption of natural resources, transforming them into units of CO<sub>2</sub> equivalent according to recognised entities. Since the implementation of this method, the data recorded shows an overall increase in our carbon footprint for the period 2020-2023. However, it is important to note that this increase does not reflect a deterioration in our environmental performance. As we have refined our calculation methodology, incorporating more variables and activities, we have expanded and refined the initial information, improving the accuracy and transparency of the final result.

Despite this increase, the APPLUS report highlights our organisation's overall trend towards controlling and reducing emissions. This shows that our efforts to implement energy efficiency measures and reduce our resource consumption are paying off.

What this means for us: This report provides us with a solid baseline from which we can set more ambitious targets and develop new strategies to further reduce our carbon footprint. In the coming months, we will work together to identify further opportunities for improvement and strengthen our commitment to sustainability.

What you can do: Each of us has a key role to play in building a more sustainable future. We invite you to actively participate in this initiative and to adopt more environmentally friendly habits in your daily life. Some simple actions you can take are:

- **Optimise energy consumption:** Turn off electronic equipment when not in use or adjust the office temperature accordingly.
- **Reduce paper consumption:** Print only what is necessary and use both sides of the paper.
- **Promote sustainable transport:** Use public transport, cycle or carpool with colleagues where possible.
- **Separate waste:** Recycle as much as possible and reduce waste generation.

We appreciate your commitment and collaboration in this important project. Together we can build a more sustainable and environmentally friendly company.
